

CADEN ASTUDILLO

Charlotte, NC | (704)705-0647 | Cgastud@icloud.com | [LinkedIn](#) | [GitHub](#)

TECHNICAL SKILLS

Programming: Python, Java, Object-Oriented Programming

Data Analysis: pandas, NumPy, Data Cleaning, Descriptive Statistics, Statistical Modeling

Visualizations and Tools: Matplotlib, Seaborn, VS Code, Jupyter Notebook, Git, GitHub, JUnit

PROJECTS

Bank of America Stadium Public Funding Analysis | Python, pandas, statsmodels

[\[Project Link\]](#)

- Analyzed Charlotte's \$650 million public investment in Bank of America Stadium and its potential economic return, using data sets given, create Python scripts to output a research question about the relationship between professional sports presence and city revenue.
- Wrote additional Python custom scripts to read in data points, output visualizations, and correlate stats of data, leveraging the pandas library to clean, organize, and analyze city-level data, then built and evaluated OLS regression models with statsmodels.
- Used Python to compile project findings into a final report and developed a group recommendation on whether stadium renovations should be supported through public, private, or mixed funding.

Winter Olympics Medal Points Analysis | Python, pandas, statsmodels, Seaborn

[\[Project Link\]](#)

- Analyzed potential factors influencing Winter Olympic performance, using country-level datasets and Python scripts to develop a research question about the relationship between population, GDP, team size, climate, education spending, athlete specialization, and medal points.
- Wrote additional Python scripts to read in data points, output visualizations, and analyze relationships between variables, leveraging the pandas library to clean, organize, and analyze country-level data, then conducted correlation analysis and built and evaluated OLS regression models with statsmodels.
- Applied the OLS regression model to predict 2026 medal performance for selected countries and compared predicted results with actual medal points to evaluate model accuracy.

WORK EXPERIENCE

Arooji's Italian Ristorante — Customer Experience

December 2022 – August 2025

- Supported serving, bussing, hosting, food preparation, and other front-of-house operations based on daily staffing needs.
- Took customer orders, entered orders into the POS system, and processed payments accurately.
- Trained new employees and collaborated with servers, hosts, kitchen staff, and management to maintain efficient service.

Jersey Mike's — Shift Manager

August 2021 – August 2022

- Managed opening and closing operations, including cash handling, transaction records, and daily financial paperwork.
- Reviewed cash-flow transactions and completed financial reports to maintain accurate daily records.
- Trained new employees, delegated tasks, and addressed customer and employee concerns.

Dunkin — Team Member

February 2021 – August 2021

- Provided customer service while managing register operations, food and beverage preparation, and cleaning.
- Maintained accuracy and efficiency while working in a fast-paced environment.

EDUCATION

University of North Carolina at Charlotte — Charlotte, NC

B.S. in Sports Analytics | Expected May 2028

Dean's List | Spring 2023 • Fall 2025 • Spring 2026
